

Adomas Bieliūnas

Developer

About me

github.com/Adix-null

I am a second year software engineering student primarily experienced with web technologies such as .NET, Vue, TypeScript, and CSS. I also have been using C++, C# and Java in various environments. My strengths - solving problems analytically with critical thinking, I like unique challenges and mathematics. While working, I hope to develop my career competences and be a productive team member.

Experience

2025-Now

Privacy Partners

IT Assistant

I started this part-time position recently. When needed, I help with various assigned IT tasks such as webpage fixes, adding a couple of endpoints, etc. I often work alone, but I also communicate with more experienced developers for guidance and feedback.

2022-2023

Naujienieris (prev. Simpletime)

Android Application Program Engineer

I learned a lot of new skills while being on this project. While working, I gained knowledge about developing Android mobile applications using Android Studio, Java and Kotlin technologies. I was also using the Firebase platform to manage user related content. Since there were only a few people on the team when I joined, I had to be responsible for many priorities - from app development to infrastructure maintenance and more. Although the number of staff was small, I also improved my skills in working with other team members.

2021-2022

VeryVilnius

Website Programmer

I created the website veryvilnius.com for an apartment rental business. It's a fairly simple static website, but while creating it, I learned about the workflow of creating pages. I also gained experience in the website maintenance infrastructure. While working on the website, I also learned to follow changing requirements and communicate with each other about specific ideas and their impact on the final product.

2021

Maisto bankas

Volunteer

While volunteering, I helped sort food and worked in a dynamic and active environment. I also learned about work-sharing strategies and gained experience communicating with colleagues.
